

Please reject the NAB's petition 04-160!

I have paid for and benefit from XM Radio's local traffic and weather channels, their variety and quality of programming is not available elsewhere. Certainly, the National Association of Broadcasters do not have my best interests in mind on this issue.

It was a mistake to have satellite television providers prohibited from transmitting local news and weather, and it took a long time to get it reversed. Please, let's not make the same mistake with radio providers.

Thank you,

Vadim Smirnoff
